The Game Creators

Publisher:

Minimum:

OS: Windows XP SP2 or better

Processor: Intel Celeron / Athlon Sempron or better

Memory: 1 G

English

Excellent Learning the Source on how different type of game been made such as learning on how to make MENU Shoot em up Operation Wolf Clone(But you can make own by learning from it!) Teris 3D PUZZLES Words Puzzles Boxed Puzzles Robot Clone Maze game Plaform game and More! For moneys that is selling is Worth the Fee alone ! I would like to see Games Pack 3 - Outrun clone, 2D Basic Real time strategy and Manager game(Not many people will know how to make Manager Game). This game pack is indispensable for learning many of the 2d features of this game engine. It has so many examples in the source code for things such as: Writing and reading from files to implement very useful features. The use of a shader in one of the games. Handling physics. Using menus. And these are just some of the things you can learn from the code. I didn't get the first game pack because it was missing the source code before (it now includes the source code for some of the games) but this one is

just perfect. I might get it now though after seeing how good this pack is. Nice job guys..
