Bought this for 2 friends and me. On my high end system it does not start single player somehow when i click.  
=(. BEST GAME EVER 5000+ PEOPLE ON MULTIPLAYER EVERYDAY (MOST ARE CHINESE). 1-9 more bug. Jesus Christ, I'm glad I only paid a dollar for it.

(SPOILERS)

Seems rushed and there were no animations at all, the devs didn't even bother to show the main monsters.

This game wasn't scary, it was frustrating. Don't bother buying it. 10/10 bEAST GAME YET KEEP IT UP. To start off with, I couldn't find a fault with the translation aspect of the game. Everthing is far better than a machine translation to be sure although you can't escape the stereotypical lines as "my hips move on their own" which is a line I hoped would just be abolished entirely.

On the actual game, it's a nukige RPG maker title. What I mean by that is that it doesn't try to make the gameplay or story engaging and is merely focused on giving you a servicable story and gameplay exprience while focusing on the H-aspect of it all. The game is aware of this fact as it gives you an easy way to level right away which I recommend doing as there is no fun to be had battling. Grinding isn't enjoyable as the exp you get from monsters is far too low to level up at a satisfying rate. Getting very high levels isn't even required as the game throws so much healing items at you, one can easily cheese their way trough "difficult" battles. It all serves as some flavor to build around the H-scenes.

Which is fine as the game doesn't try to be anything different, what you see is what you get evident from nearly all monsters looking like grey blobs before the battle without any orginal sprite provided for em which tells you enough how much focus has been spent on monster battles.

What the game does do good is the scenes themself as the artwork is very pleasant to look. It might not be as good as Melty's quest but it nice to people who are into corruption themed scenarios. What could have been done better is the integration with the story as the scenes themself are disconnected from it as there is no change in the story depending on the amount of depravity one possesses which seems like a missed opportunity to me.

For the price, its an enjoyable title for those that come for the H-aspect of it and are not relying on an engaging story or more than bare-bone battle mechanics.. tasty fights, nice graphics, next to no players in multy though.

---

Fantastic gameplay and wonderful experience. The story is great and completely immerses you in the gameplay.. I really like this game!

Hoping to see more of DinerBros!

I agree with many of the reviews. It would be nice to have more recipes and a longer campaign.

A trashcan would be great also.

Edit: Love Diner Bros!!! 5stars :D. I enjoyed this game :). broken multiplayer. you can connect to lobbies but the other person doesn't see that you joined and you can't select anything. dev blames that you aren't on the latest version, even though the only version is 0.0.1. got this game from a friend to play it with him. do not buy until the game is fixed. I was Skeptical at first as an epic fortnite gamer like me should be but i gotta say this game was amazing; All of the best moments come from the first level. I wont spoil much beyond the start but you wake up in a darkly lit room with your famliy and friends missing and infront of you lay 9 cards with troll faces on them and your captors strike a deal that if you can do 100 rounds of their matching game in an hour they will let you and your famliy free. The story arc of your faceless protagonist is very compelling and feels like nothing else on steam can match the quality of this game.

853V1000. <https://www.youtube.com/watch?v=SVBK7GbZraU>

My full review and opinion of this game:

I really like the art style of this game. As a clicker, it's actually pretty fun and entertaining.

The sound track is pretty good.

The pop culture references are awesome.

I got to play as a jacksepticeye rooster.

However, the price for this game is not particularly fitting. It's fun, but I can't honestly recommend paying \$7 for it unless you REALLY like clicker games.

Final rating would be around a 7/10, if i'm ignoring the price.. You may look this like one of the "easy and cheap" game, but turns out it was a really good and fun game!

Chicken army FTW!. This game is super weird and fun! The hand drawn art style is super cool and the story of the game is very charming and funny.

You can see me play through the game here:

<https://www.youtube.com/watch?v=jWF4bLR04AA>. So much fun so glad this is on steam played on other sites but this is the best.
